Taking the Wonderful New Cure for Consumption

Chemo-Magnetic Light Rays, the Triumph Over

CONSUMPTION

Consumption has at last found a master in the electric light raystreatment, which marks a new era in medical practice.

While noted physicians all over the world were bowing to the supposed inevitable, giving up their consumptive patients to die, Mayo has discovered an agent for utterly routing the deadly germs from the system. And when the goal of our ambition was reached we immediately set about proving to doctors and patients everywhere that our discovery was not investigate.

imaginary.

This great treatment goes even farther than curing coughs and colds that "hang on." It completely and forever kills the deadly bactili, heals the raw mucous surfaces, invigorates and fortifies the system and makes

solid, healthy flesh.

It cures consumption in any stage. It annihilates asthma, bronchitts, lung weakness, catarrh, la grippe and its after effects, and all pulmonary

WE CURE CONSUMPTION

Not an occasional case, but by the hundreds. Delay is death! Why do you delay? Ours are the only offices on this coast fully equipped with Electrical Apparatus for giving all kinds of ELECTRICAL TREATMENT. Ours are the only offices on this coast fully equipped for giving the new and wonderful Light Rays, by which we cure Consumption, Asthma, Bronchitis, Dyspepsia and a long list of diseases. With these wonderful Light

DISEASES OF WOMEN By this method we relieve ASTHMA instantly, and permanently ours it

AGRICULTURE AND HORTICULTURE

(Special Dispatch to The Herald.)

New York, Dec. 12.-Dealers are apprehensive over the Santa Fe strike, and are inclined to hold California oranges firmer. The supply is increasing, but buyers are taking everything offered at full prices. Floridas are firmer in view of possible shortage of Californias. Lemons are quiet but firm, and many buyers specify Californias in their orders. Today's auction sales were at following prices:

Washington navels, \$2.90@3.25; Excelsior seedlings, 200s to 300s, \$2.35@2.60; Sunflower navels, 80s to 112s, \$2.35@2.65; 126s to 216s, \$2.45@3.00; Excelsion navels, 126s to 216s, \$2.40@2.90; 216s to 250s, \$2.95@3.05.

Floridas, \$2.75@3.50. Jamaicas, \$3.75@4.85 a barrel.

LOCAL CITRUS FRUIT MARKET

Wednesday's shipments of citrus fruits show that there is a marked reduction, due to the approach of the holidays. It is an invariable experience that at holiday time there is more or less of a readjustment of market conditions. It has sometimes happened that a surplus of oranges on the markets following the holidays has had a depressing effect, but it looks now as though the markets would be able to handle all the fruit that has gone forward, and that the situation is favo able for a resumption of business after the holidays on a satisfactory basis.

Wednesday's shipments were: Oranges, 53; lemons, 2; total for the season,

PRESIDENT NAFTZGER ON FRUIT SITUATION

"The fruit growers' convention which was held in San Francisco and adjourned last Saturday did much towards setting in motion influences which will crystallize into results beneficial to the growers of Southern California," said A. H. Naftzger, who represented the California Fruit exchange at the convention, when seen after his return. "The advantages of co-operation will without doubt be experienced shortly by Southern California fruit growers, and if the reports which will be returned by the committee appointed to prepare documents for presentation to the railroads are properly followed up the beneficial results derived from that source alone will more than compensate for the trouble and expense incurred by the holding of the convention. Then the filing of the resolutions passed relative to the Jamaica and other reciprocity treaties as related to certain lines of trade, which will be submitted to our representatives at Washington, must, of necessity, carry much weight. The interest taken in this convention was far in advance of that taken by previous bodies and proves the awakening of the fruit growers to the advantages

"The results which will be derived from the establishment of a national quarantine-a thing almost assured by the actions taken by the convention, cannot be too highly estimated, and the active aid of all Southern California growers and shippers should be given to this important feature. I regret exceedingly that the telegraphic accounts of the actions taken were so meagre, as every person who is interested in the welfare of the greatest industry of Southern California should know of the conditions existing and possible. Their interest in the matter is shown by the fact that since my return—a comparatively few hours-I have been constantly besieged by clamoring demands

"It is well known that Mexico contributes much towards the despoiling of our crops in passing across the border to us diseased and Morelos infected fruits. Our state quarantine is supposed to prevent the importation of these, but its work, while worthy, is wholly ineffectual. The larvae-infested cars are passed without treatment, and in this manner an apparently innocent empty refrigerator brings to the grower and shipper the insect which works such havoc with the fruit. The establishment of a national quarantine will prevent this, cars being subjected to a thorough search and drastic methods for exterminating the pests being employed."

Considerable annoyance was felt by the members of Southern California fruit growers' organizations at the recent convention at the characterization of a "trust" which they were given. In his paper on the need of co-operation and better facilities for transportation, which President Naftzger read, he

"Co-operation is not a patent device for reforming all the evils that afflict fruit growers; it does not undertake to avenge the wrongs, real or imaginary, which individuals may have suffered at the hands of other individuals or corporations, nor is it a scheme of philanthropy by which the indolent and careless are made prosperous and contented. It is not a reversal of the laws of business nor even a new system of commercial rules, although it may seek to introduce new practices or closer adherence to long-established rules. It cannot be independent of the every-day requirements of economy, industry and good judgment. If the common virtues of honesty, application and vigilance are wanting, co-operative organization is sure to fail. Co-operation is not a trust or combine in the modern sense of these terms, and it is a matter of regret that the organizations of California fruit growers are sometimes referred to as though they were conspiracles, offensive and defensive, which they are not. 'Co-operation is not a patent device for reforming all the evils that afflict

"Co-operation, as applied to the California fruit industry, seeks to end the warfare of competition, to put the growers into relationship of mutual help-fulness instead of perpetual antagonism. It delivers the individual grower from the middlemen and capitalists, who would make him sell his product for the lowest price while compelling the consumer to pay the highest. It reduces the expense of operating, giving the grower a fair profit and making it possi-ble to open new markets by introducing fruits where individuals could not introduce them, by reason of the expense.

"Regarding transportation, the fruit growers of Southern California, have struggled with the railroads in vain. Citrus fruit growers believe the freight rates too high. For years all arguments on this point have been answered by the carriers with the plea that this traffic must be moved on a rapid schedule and that, for the most part, the cars must be hauled west empty. "So far as rapid time is concerned it is nearly a thing of the past, and right now, as we are beginning to fill Christmas orders for oranges, there is a car famine, because the carriers will not haul west empty. It is my belief car famine, because the carriers will not that west empty. It is my best that the root of all this trouble is much deeper than any explanation or excuse of the carriers would indicate—and not very difficult to find if the fruit growers will go after ? with the right kind of a pick. Resolutions of conventions ers will go after ? with the right kind of a pick. Resolutions of conventions and the concerted action along careful lines will uncover and remedy and the concerted action along careful lines will uncover and remedy and the concerted action along careful lines will uncover and remedy and the concerted action along careful lines will uncover and remedy a content of the careful lines will uncover and remedy and the concerted action along careful lines will uncover and remedy a content of the careful lines will be careful lines and the careful lines will be careful lines will be careful lines will be careful lines will be careful l the evil. Until such time as we have the Nicaragua canal we cannot do without the transcontinental roads. After that we shall hear no longer that the present freight schedule is as low as it can be made and earn reasonable divi-

dends for stockholders of the roads.

"The present freight charges may have been reasonable when the traffic was light, but I believe them to be excessive now. The refrigeration tariffs I know to be exorbitant. The service is the worst in the history of the business. The time is now exasperatingly slow for perishable shipments and other items of service so essential to safe delivery are thoroughly bad. Overloaded cars and overloaded trains cause rough handling, broken and disordered packages, entailing great loss to the shippers. We have simply reached, in this traffic, a condition which is common where competition among carriers has been abolished by their joint agreement. In this case the situation is aggravated because the refrigerator lines are also included in the agreement.

"If you ask, what is the remedy for all this, my answer is: Do as the railroads do—stand together! It is idle to spend time denouncing railway managers as public enemies. Traffic managers are really deeply interested in us, because they are permitted to exercise functions that do not properly belong to them. It is not correct to my that a railroad is a purely private affair. It dends for stockholders of the roads.

to them. It is not correct to say that a railroad is a purely private affair. It exists by the exercise of what is popularly called the 'right of eminent domain.' In other words, it takes unto itself the privileges and functions which belong to the public, and if the public permits it to use these privileges unjustly and oppressively the public is to blame. We must meet combination with organization, and when the fruit growers of California are unified, their plea will take the form of a demand which will be heard and answered."

THE GREAT ENGLISH CONSUMPTION HEALER AND

Mayo's Great Cures

It is no longer hearsay, but a positive fact that defies contradiction, the MAYO remedies are the medicines of the 20th century. Ten days ago Mayo was looked upon with suspicion. Today he is blessed and honored by the sick people of your city. This is the result of having a medicine that cures where others fail to touch the first rungs of the ladder of relief. It is a positive fact that some of the most stubborn and baffling diseases of men have been completely cured in this short hat is guaranteed to cure, or your money re-unded. Mayo is an X-ray expert; is provided with the most recent and expensive developments of the X-ray apparatus, whereby he is enabled to see the most remote part of the human body. Increby he is enabled to give an absolute and ac-

Mayo has 10,000 sworn testimonials of the Mayo has 10,000 sworn testimonials of the most remarkable cures ever performed in the annals of medical history. He is a regular graduate, receiving his education in the old country and was an associate of the late Sir Morreli Mo-

Kenzie.

Convincing record of the triumph of his rem-

Convincing record of the triumph of his remedies over disease, makes cripples leap for joy and cures the weak, nervous, dyspeptic and paralytic in a most remarkable manner by a new system of medicine from Europe.

No man ever visited America who has performed such extraordinary cures as has Mayo, the great foreign healer. He was long connected with Count Maetti, who set the whole of Europe in a furor. He performed many remarkable cures by certain secret preparations, which raised the jealousy and enmity of the medical profession, because they could not understand how he performed such cures; but he went on healing the sick, until now he is looked upon as a power upon earth. While associated with Count Maetti he learned many secret yet simple means of curing acute and chronic diseases not known to physicians, which he, assisted by eminent specialists, is applying to hundreds of sufferers who visit their offices daily. No charge will be made until you are cured, except for the medicine necessary to effect a cure, and every cure guaranteed.

The City Wild With Excitement-Read the Account of Mayo's Latest Wonderful Cures-Another Cripple Cured

Mr. George Duffy, 367 Cornwall street, has been a cripple for 18 months with Sciatic Rheumatism, unable to walk without the assistance of canes, owing to the great pains, stiffness and weakness. Several remedies were applied in full view of the audience Saturday night, and to the astonishment of everybody, in 45 minutes Mr. Duffy was able to walk and stamp his feet without pain. The audience cheered and shouted as Mr. Duffy walked home without his canes. Hundreds of people followed him—they could hardly believe their own eyes, but it was done. Several doctors said it was the most remarkable Ling they ever witnessed. This was done in view of the audience, so there was no mistake about it.

Another Surprising Case

Mr. A. W. Norman, 2117 Sacramento street, has been a cripple for several years, and unable to walk without assistance of his cane, owing to great pains, stiffness and weakness, and several doctors tried to cure him, but failed. The Mayo remedies were applied, and to the astonishment of everybody, in an hour Mr. Norman was able to walk and stamp his feet without
